STRATEGY DESCRIPTION

Fairfield Sigma Limited invests its assets principally into Fairfield Sentry Limited, and utilizes some assets to hedge the dollar exposure of its investment in Sentry into Euros. The Fund seeks to obtain capital appreciation of its assets principally through the utilization of a nontraditional options trading strategy described as "split strike conversion", to which the Fund allocates the predominant portion of its assets. The investment strategy has defined risk and reward parameters. The establishment of a typical position entails (i) the purchase of a group or basket of equity securities that are intended to highly correlate to the S&P 100 Index, (ii) the purchase of out-of-the-money S&P 100 Index put options with a notional value that approximately equals the market value of the basket of equity securities and (iii) the sale of out-of-the-money S&P 100 Index call options with a notional value that approximately equals the market value of the basket of equity securities. The basket typically consists of between 40 to 50 stocks in the S&P 100 Index. The primary purpose of the long put options is to limit the market risk of the stock basket at the strike price of the long puts. The primary purpose of the short call options is to largely finance the cost of the put hedge and to increase the stand-still rate of return. The "split strike conversion" strategy is implemented by Bernard L. Madoff Investment Securities LLC ("BLM"), a broker-dealer registered with the Securities and Exchange Commission, through accounts maintained by the Fund at that firm. The services of BLM and its personnel are essential to the continued operation of the Fund, and its profitability, if any. The Investment Manager, in its sole and exclusive discretion, may allocate a portion of the Fund's assets (never to exceed, in the aggregate, 5% of the Fund's Net Asset Value, measured at the time of investment) to alternative investment opportunities other than its "split strike conversion" investments.
